## PROFESSIONAL EXPERIENCE

- AI Engineer | TecAce Software Ltd

Bellevue, WA | April 2025 - Present

  - Architected a governance-first, privacy-first enterprise AI agent platform with a retrieval-augmented generation (RAG) pipeline (LangChain, LangSmith, LangGraph), deployable on hybrid infrastructure — cloud (AWS) or fully on-prem with self-hosted model serving — so regulated teams keep sensitive data inside their own perimeter
  - Engineered LangGraph-based agentic workflow platform — visual flow builder with intelligent routing, guardrails, conversation memory, and node-level inference overrides powering multi-agent enterprise applications
  - Built messaging-platform integration gateway connecting Slack and Microsoft Teams to AI applications with signed webhooks, multi-app alias routing, and real-time SSE streaming replies
  - Developed hybrid search optimization implementing RRF reranking, cross-encoder reranking, and score fusion techniques for enhanced search relevance across Milvus vector databases
  - Delivered external developer platform — access-key-secured public API gateway plus a complete data-driven API reference documentation portal covering 500+ endpoints across six microservices
  - Championed AI-native engineering practice orchestrating coding agents (Claude Code) through spec → plan → multi-agent implementation → adversarial QA workflows across a 12-repository platform
- e-Commerce Engineer/Owner | Roem Ventures LLC

Seattle, WA | May 2022 - Present

  - Founded and developed e-commerce brand from concept to market launch including comprehensive product development, logistics coordination, and business operations management
  - Engineered custom Shopify solutions using Liquid programming developing tailored plugins and functionality enhancements for optimized user experience
  - Implemented integrated marketing campaign strategies utilizing Google AdWords and Facebook Advertising platforms for targeted customer acquisition and conversion optimization
- Software Engineer - Xfinity X1 & Flex | Comcast

Philadelphia, PA | Oct 2017 - Nov 2021

  - Successfully developed and maintained Xfinity Flex Streaming product from ground up building key middleware APIs that power core Flex features, resulting in positive customer feedback
  - Exceeded subscription acquisition targets by 1000% surpassing initial goal of 100K subscriptions within six months by acquiring over 1 million subscriptions
  - Developed and maintained core features for cloud-based X1 Guide interface directly impacting over 31 million customers across Xfinity TV platform
  - Implemented scalable backend architecture using distributed systems design principles to support millions of concurrent streaming users
- Startup Founder | Parkgorithm

Philadelphia, PA | May 2016 - Jun 2017

  - Founded startup company with vision to resolve urban street parking challenges through innovative mobile technology solutions
  - Led cross-functional development team managing product roadmap and technical implementation for Android mobile application MVP
- Software Engineer | Graphite GTC

Bryn Mawr, PA | May 2015 - May 2016

  - Developed client-side applications for Android and Web platforms implementing responsive user interfaces and cross-platform compatibility solutions
  - Contributed to development of proprietary Graphite software platform focusing on user experience optimization and performance enhancement
- Undergraduate Researcher | Temple University

Philadelphia, PA | Jun 2015 - Oct 2015

  - Conducted computer vision research under NSF funding developing machine learning algorithms for mobile robot object detection and recognition systems
  - Developed innovative "Supported\_By" algorithm in MATLAB enabling spatial relationship detection for autonomous robotics applications
- Founder/Sales Director | Fatty Pocket

Norristown, PA | Sept 2011 - Jul 2013

  - Founded and scaled digital marketing platform collaborating with local businesses to develop and execute targeted coupon marketing campaigns across multiple industries
  - Led business development and sales operations managing marketing professionals and sales teams to identify growth opportunities and maintain strategic vendor relationships

## TECHNICAL SKILLS

|                                                                                                                                                                                                            |                                                                                                                                                                                                                                                                     |

## CERTIFICATIONS

Anthropic — Claude Certified Architect: Foundational (CCA-F) | Issued June 5, 2026 · Valid through June 5, 2027 · Verify: credly.com/users/john-ryu

## KEY PROJECTS

- TecAce AI Agent Studio - Governance-First Enterprise Agentic Platform

Hybrid search (BM25 sparse + dense vectors), LangGraph agent workflows, guardrails/evaluation, and multi-platform chat integrations — deployable on hybrid cloud or fully on-prem infrastructure for data-sensitive teams. Tech: Python, FastAPI, LangChain/LangGraph, AWS Bedrock, on-prem vLLM, Milvus
- MarketScopeAI (omnidora.com) - AI Marketing Automation SaaS

AI employees that qualify leads, nurture prospects, and run marketing playbooks 24/7 for small businesses. Tech: Next.js, TypeScript, AI Agents
- PlinthPrep (plinthprep.com) - CCA-F Exam Prep Platform

Practice-exam platform for Anthropic's CCA-F certification with AI-generated question variations, cheat sheets, and decision trees. Tech: Next.js, Claude API
- RecompIQ (recompiq.com) - Health Data Coaching App

Body-recomposition tracker for protocols, nutrition, biomarkers, and workouts with evidence-graded insights and projections. Tech: Next.js, TypeScript, Data Visualization

## EDUCATION

Bachelor of Science in Computer Science  
Temple University | College of Science & Technology | Philadelphia, PA
